- Game process logging.

**INTV provides guarantee and post-guarantee repair service and maintenance of INTV, EVS and other companies equipment.**

INTV – is official partner of **EVS Broadcast equipment**, we provide day and night technical support 24/7 for regular customers. Stock of original spare parts and backup EVS equipment are located in Moscow and St. Petersburg, which allows customers to get quick and quality service.

### Special offer for users of XT[2] servers:

You can change your old XT [2] for new series servers XT[3]/XT4K with advanced features:

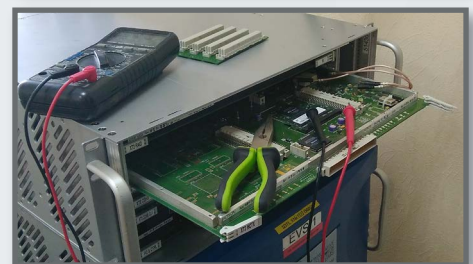

- 12 channels instead of 6
- More disk space (180 hours of video instead of 24),
- Support 32 channels of sound instead of 6,
- A set of new codecs for modern video editing stations,
- Multiviewer.

Servers of the new generation will make video recording in the newest digital formats 3G-HD, 4K-UHD, 12G, 2022-IP.

Warranty for the equipment - 2 years, for HDD - 4 years.

Technical support with delivery from the stock of our offices in Moscow and Saint-Petersburg.

Big experience of our R&D department engineers in PCB design and electronics allows to inspect and detect broken IC of the professional equipment and repair them instead of changing whole modules that makes repairing less expensive.

## SERVICES Trainings and certification

We are providing special training programs for TV companies staff: engineers, graphic operators, directors and others. Courses can be held in INTV demo studios or in the clients territory.

The efficiency of studio equipment operation directly depends on the qualification and knowledge of engineering personnel. INTV trainers works on broadcasts every day and have big experience. We trained more then 200 specialists for sports, news and TV shows broadcasts.
